

FEBRUARY 26, 2018

3rd Grade Learning

Congratulations to Karlee, our most recent Student of the Month! Karlee is a helpful classmate who sets a great example for her classmates. Way to go!

Reading

Students completed their research club reading. After February break, each research club will create a game to showcase their learning.

Math

Students reviewed their midyear test and learned two new games this week: Salute! and Rolling for Squares. They also worked on reviewing square products and the near squares multiplication strategy.

Writing and Cursive

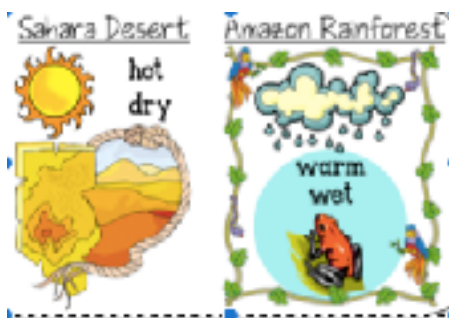

In writing, we worked on writing a main idea topic sentence with supporting details. Students completed their lowercase cursive letters. After break, they will write in cursive.

Spelling

Our word study after vacation will focus on Consonant blends: pr, sh, th, and pl.

SCIENCE

The end of our weather and climate unit will focus on obtaining and combining information to describe climates in different regions of the world.

Thank you to all of the families that came out to support our Third Grade Learning Celebration! We had almost 100% participation with 17 out of our 19 families able to attend!

The students have worked hard this year, and I look forward to sharing their continued growth with you!
